

# Protect Your Data From Malicious Ransomware Threats

## Rise in Ransomware Attacks<sup>1</sup>

**40%**

**33%**

of business attacked by ransomware

of ransomware victims lost revenue as a result of the attack

## HPE and Veeam Solutions Overview

### Rapid Data Restores and Recovery

HPE Storage Snapshots enables fast virtual machine (VM) and granular recovery

### Infrastructure Lockdown

An integration with HPE StoreOnce Catalyst makes backup images invisible to ransomware

### Testing Environment

With Veeam On-Demand Sandbox and SureBackup, test and remove ransomware items quickly before restoring VMs to production

### Built-in Ease of Use

Leveraging the built-in backup assessment to ensure critical VMs are protected with the Veeam ONE monitoring, reporting and capacity planning tool

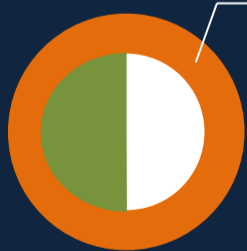

*“There’s no one method or tool that will completely protect you or your organization from a ransomware attack. But contingency and remediation planning is crucial to business recovery and continuity.”*

- Former FBI Cyber Division Assistant Director, James Trainor

**Hewlett Packard Enterprise**
