

BLAIR CLOUD SOLUTIONS

Accelerate Your Cloud Journey with Blair

For most businesses today, moving to the cloud is much less about the “why” and more about the “how”. Increasingly, I.T. and business leaders realize that cloud is not just a location to put data on. Cloud is a method and a process that enables agility to adapt to the dynamic needs of business today. Often the first step in an organization’s digital transformation strategy is the journey to the cloud, and it doesn’t always go smoothly.

If you are working on your organization’s cloud migration initiatives and are finding the progress is slower than expected, or more complicated than you thought, you are not alone. Organizations are challenged with complex cloud issues including but not limited to:

- How to integrate multi-cloud environments (public, private, and hybrid cloud) with legacy environments
- How to ensure privacy and security is intact
- How to meet the increasing demands for I.T. governance, compliance, and risk management

Blair’s Cloud Solutions are designed to improve productivity and efficiency in your organization. Our approach is to help you find out where cloud best fits in your I.T. and business strategy, whether it is for computing, backup and archive, disaster recovery, or test and development.

PROVEN METHODOLOGY

Our proven methodology begins with a detailed, in-depth cloud assessment to help discover if your business is ready for the cloud. This is followed by a design, installation, and configuration to provide scalable, secure, and reliable cloud infrastructure. By leveraging Blair’s decades of experience in backup and business resiliency, you can enjoy peace of mind knowing that what’s important to your business is monitored and maintained all year round.

Blair’s Cloud Solutions are designed to improve productivity and efficiency in your organization with scalable, secure and reliable cloud infrastructure.

BLAIR CLOUD SOLUTIONS

BLAIR CLOUD SOLUTIONS

Innovative, Agile and Trusted Cloud Solutions

Blair Cloud Solutions and Blair's expertise are a winning combination to enable you to securely move, manage, protect, and use your data anywhere, anytime, and with any workload.

BLAIR CLOUD MANAGEMENT

Blair Cloud Management provides tools and products to assist our clients with their digital transformation journeys using multiple cloud strategies, such as Office 365 and Blair Private Cloud. Our proven methodology centers around technology, people and a process to make sure your multisource workloads are migrated securely and efficiently to the cloud.

BLAIR PRIVATE CLOUD

Blair provides a secure 7x24 virtual environment to host your systems and data. Our high-performance infrastructure can be customized to support your most demanding applications while providing the

security and control you need to address your compliance requirements.

BLAIR BACKUP AS A SERVICE (BAAS)

Blair BaaS is an enterprise-grade backup service that protects your critical business data utilizing Blair's Private Cloud for short-term retention. It also has the flexibility to support multiple cloud providers for long term retention needs. A single pane of glass reduces the complexity of data protection by simplifying management for extensive applications and services coverage. With your backup solution being monitored and maintained 7x24 by the Blair NOC, you minimize risk and gain peace of mind.

BLAIR RESILIENCY AS A SERVICE

Protecting your business from disruptions of any kind is no small task. Blair Resiliency as a Service ensures an always-on customer experience for your applications

and hardware with improved RTOs and RPOs. We conduct proactive and nondisruptive testing of your Disaster Recovery Plan, and we monitor your I.T. infrastructure 7x24 so your I.T. staff can focus on core business functions and innovations.

ABOUT BLAIR TECHNOLOGY SOLUTIONS

For over 22 years, Blair Technology Solutions has provided innovative and flexible I.T. solutions to mid- to large-sized enterprises across Canada. Our full complement of adaptable, scalable, and versatile solutions are designed to meet organizational requirements.

From traditional infrastructure to managed services and cloud technology, Blair has expertise in building custom solutions to meet the needs of unique I.T. environments.

Backup as a Service

Enterprise wide backup service to back up critical data to Blair's Private Cloud for short term retention and Public Cloud for long term archive anytime, anywhere, any workload

Cloud Management

A proven methodology to move workloads to the cloud to ensure a smooth and secure transition

Resiliency as a Service

Disaster Recovery solutions for business critical systems in Blair Private Cloud or Public Cloud

Private Cloud

A secure 24/7 virtual environment to protect critical data and applications, and run customized workloads, such as IBM Power i/AIX
